

GRAINPRO® MOISTURE METER™

Features & Advantages

- Portable and handy
- Built-in measuring cups
- Measures up to 19 types of grains and seeds
- Provides accurate readings equipped with digital readout
- Combined grinding and compression of sample
- Automatic temperature compensation
- Automatic calculation of average value
- Individual calibration for all grain types
- Grinder made of hardened galvanized steel
- Casing in shockproof/resistant plastic

The GrainPro® Moisture Meter™ is a resistance-type handheld device that provides a direct readout of the moisture content level of different types of grains and seeds. It is used to guide farmers or users in determining whether the crop is at the right moisture content for grains and seeds to be processed or stored.

This digital moisture meter comes with automatic temperature compensation to ensure more accurate and reliable readings. It is a pocket-sized grain moisture meter where the grain is ground and compressed in one operation.

The GrainPro® Moisture Meter™ is suitable for the following commodities:

Wheat	Corn/Corn grit
Sunflower seed	Paddy Rice Short
Broken Rice	Paddy Rice Long
White Rice	Peanuts
Brown Rice	Coffee Robusta
Buckwheat	Coffee Arabica
Cocoa	Soybean
Green grams	Sesame
Peas	Sorghum
